LOCAL NEWS.

Miss Annie McKinlay, who
had been teaching school at
Portview (across the river),
has accepted a position on the
teaching staff at Red Willow
school.

Mrs A J Shanl left last
week on a visit with relatives
at Vancouver, Portland and
Seattle.

Chas Chesser was a visitor
in Stony on the holiday.

Stony Plain Local of the
U. F. A. will hold a meeting
Saturday Jan. 8.

Dr Scott Hamilton, dentist,
who has been making regular
weekly visits to Stony
for the past two years, has
withdrawn, his place being
taken by Dr G B Thurston,
who will continue these visits
but instead of Thursday after-
noons will be here on Friday
afternoons, starting Friday,
Jan. 14.

Mr C W McKenna, a former
resident of this district,
now of Edmonton, was here
on a business trip over the
week-end.

At the close of the morning
service in the Luthera chapel
in Stony Plain, on Sunday
last, Miss Annie Thoms was
united in marriage to Mr
Adam Bevon Jr., all of Stony
Plain. The ceremony was per-
formed by Rev E Eberhardt.

At the local Court, Thurs-
day, Miss E Sinner was charged
with that on Nov 24 at or
near Winterburn she did drive
a motor vehicle recklessly or
negligently, etc. After the evi-
dence of half-a-dozen wit-
nesses was taken, the case
against Miss Sinner was dis-
missed with costs on the
complainant. Lundy for the
defence.

All the students from Con-
cordia College who had been
holidaying here, returned on
Monday to their studies.

Those who were present
Monday night at St Matthew
Schoolhouse No. 2 heard a
very interesting address on
"The Power and Work of the
Bible," by Mr Lytle of the
Canadian Bible Society.

Stony's 24-hour phone ser-
vice came into effect Jan. 1,
and is proving very conveni-
ent to the patrons.

Inga Councillors meet in
Stony Plain tomorrow (Fri-
day) Jan. 7.

Mr Meredith shipped two
cars of cattle to Edmonton,
on Tuesday.

The New Year's Eve dance
in Stony was a very pleasant
affair, with good music and
plenty of room for the dancers.

The Hockey Club intends
holding a big dance Friday,
Jan. 14. Martin's orchestra
will be present, and this
should assure a record crowd.

M M Mecklenburg, the
well-known optical specialist,
will be at the Royal Hotel,
Stony Plain, on Monday,
January 31st. See him and see
good.

Jap oranges just arrived, at
Hardwick's.

International Ignorance

Ignorance and misunderstanding among the nations cause more trouble than the machinations of political leaders, who are blamed for so many of the world's ills. Democratic government, says a Japanese former minister of education, has reached such a state that the few well-informed men of international outlook in any country are overshadowed by the weight of passion, prejudice, and the unreasonable fear and ignorance of the masses. He ascribes the present mischiefs of the world, in nine cases out of ten, to international ignorance and stupidity, and the same cause he assigns as the chief reason for the strained relations which have existed in recent years between the United States and Japan.

This Japanese statesman holds that the greatest need to the development of a better understanding between these two countries is more publicity, the printing by the papers of both countries of more news—more sympathetic news—of happenings in the other country, and a sympathetic interpretation of it. He advocates cheaper radio and cable tolls which, he states, would be an incalculable aid in bringing about the consummation of this campaign of education against the great and always present danger of national ignorance.

Undoubtedly one of the reasons for the sympathetic and good relations existing between the United States and Canada is that we understand each other—an understanding brought about by a common language, the free exchange of newspapers and periodicals of all kinds, free intercourse across the border by mail, telegraph, telephone, radio, automobile and train. While maintaining separate nationalities and quite different national ideals, and with no thought of political union, there nevertheless exists the closest ties of friendship and understanding so that the mere thought of war is abhorrent and impossible.

The secret is that we understand each other, and that understanding is the outcome of knowledge of each other. Each country is able to see the other's viewpoint. If, instead of this knowledge, there was great groups of people dividing the North American continent between them steeped in ignorance of each other, there would be constant friction.

One of the sources of strength possessed by the British Empire is the knowledge which each component part has of the other parts. Statesmen have always recognized the importance of the rapid and continuous dissemination of information throughout the Empire. And every encouragement has been given to the provision of inter-Empire means of communication by cables, steamship lines, Imperial penny-postage, and in these later years by the development of aerial communication. Not the least of the advantages of the periodical Imperial Conference is the discussion and understanding of Empire problems which result from such which understanding comes.

So, too, in the annual gatherings of the League of Nations Assembly, and the frequent meetings of the Council of the League and its many committees, is to be found one of the greatest of all preventative of future wars. These meetings bring about mutual understanding and dispel ignorance and prejudices. Only recently one of the outstanding figures in the public life of Germany of today declared that had there existed the same machinery for consultation between the nations prior to 1914 as is now provided by the League of Nations, the Great War would never have been fought.

The need of the whole world is greater knowledge,—that is greater international knowledge. Fortunately, the trend of modern inventions is to facilitate the dissemination of such knowledge and to promote world travel and international intercourse.

Departing for a moment from the international aspect of this fundamental question of knowledge versus ignorance, it will readily be appreciated that the same truth has equal force when applied to Canada itself. Any weakness in our national position today is to be found in a lack of complete understanding between the different parts of the Dominion, in the fact that Maritime Province conditions are not as fully understood and appreciated in Ontario and the West as they used to be and because in Ontario and down by the Atlantic seaboard it is difficult for them to visualize and grasp our Western problems.

In the development of that much to be desired knowledge of each other every possible agency should be employed,—through the press, by means of national conventions, encouragement of tourist traffic within the Dominion. In which good roads, railways and even airplanes will play their part. The replacing of ignorance by knowledge will do more than anything else to create a strong and united Confederation, just as certainly as it will remove causes of international misunderstandings and friction which lead to war.

Always Double Liability

Home Bank shareholders didn't have a ghost of a chance to escape double liability when the master came into court. "Purchasers of bank shares do so with their eyes open, if anything happens to the bank, they are liable for twice the amount of their shares. However, most people would take that chance on the stock of the Canadian chartered banks of today."

The city of Detroit was photographed recently from a distance of 210 miles, aviators using a new 45 pound lens, 9 inches thick.

Rebus—"Nigger, ah also does believe in its evolution theory: he have a ghost of an idea that you 'golved from a monkey'."

Brown—"Nigger, ah believes in evolution, too, 'n nigger, you looks like 'you ain't 'voiced yet'."

Forests once covered 822 million acres in the United States. About 25 per cent of this area has been reduced.

A woman is always contrary enough to agree with a man when he doesn't want her to.

Huge Amount Left By Auto Tourists

Canada Reaped \$194,000,000 During First Ten Months of Last Year

Automobile tourists from the United States entering Canada during 1926, left a gross revenue to the people of the Dominion of about \$194,000,000, according to a recent estimate made by A. W. Campbell, Dominion Commissioner of Highways. In 1925 the estimated gross revenue from this tourist traffic was \$188,555,400. The latter figure, however, was for the twelve months while the figures on last year's business was not complete, and only for the ten months ending with October, so that the increase for the entire calendar year of 1926 will show an even larger advance over 1925.

From Jan. 1 to Oct. 31, 1926, the numbers of United States cars entering Canada at Customs ports of entry for touring purposes were as follows: Under the twenty-four hour period, 1,263,185; estimated gross revenue from these, \$37,282,150. Thirty-day-period permit, 530,712 cars; revenue, \$159,222,690. Six-month period, 4,403 cars; revenue, \$7,325,160.

An indication of the extent of the increasing United States automobile tourist traffic is furnished in 1925 year's totals at the principal entry places: Into British Columbia, over the Los Angeles-Vancouver Highway, 70,000 cars; Lord Selkirk Highway, at Emerson, Twin Cities to Winnipeg, 8,000 cars; Soo, 6,000 cars; Sarnia Port and Port Huron, 50,000 cars; Detroit, 50,000 cars; Niagara Falls and Bridgeburg, 820,000 cars; Kingston, Prescott and Brockville, about 13,000; St. Lawrence River or Quebec Province, about 460,000 of which, were for the one-day period, as only a narrow river interface.

The explanation offered as to the large number of cars entering at the Niagara border compared with the small number at Quebec points is that there are many sightseers at Niagara Falls and many commercial transactions between United States and Canadian towns and cities there.

The Proven Asthma Remedy. Since asthma existed there has been no lack of what heralded remedies; they have proved short-lived and worthless. The ever-growing reputation of Dr. J. D. Kellogg's Asthma Remedy has given it a place in the field of medicine which no other can approach. It has never been pushed by sensational methods, but has simply gone on effecting relief and making new converts.

Uses American Slang

American slang has become a part of everyday speech of Anton Lang, the "Christus" of the Passion Play at Oberammergau, said Prof. C. H. Conner of Wesleyan University. The professor visited Lang while in Germany last summer and noted that while he spoke excellent English he frequently used with evident delight many colloquial phrases which he had garnered while in this country.

Miller's Worm Powders will drive worms from the system without injury to the child. The powders are so easy to take that the most delicate stomach can assimilate them and welcome them as speedy easers of pain, because they promptly remove the worms that cause the pain, and thus the suffering of the child is relieved. With no stirring a remedy at hand no child should suffer an hour from worms.

Holds "Great War" Sale

British Disposing of Leftover Properties Worth Millions
 England will finish one of the biggest jobs of salesmanship ever undertaken by a single government when \$3,400,000,000 worth of property from practically every former fighting front of Europe will be disposed of about March 1st.

Lands, buildings factories, railway materials, foodstuffs horses, barges, medical supplies, and a host of other items are included in the list of properties left on the hands of the government at the close of the war. The commission in charge of selling began its work in 1919 with a staff of 47,000 men. Five are handling the final phases of the job.

A lover of a former day would thus describe his fiancée: "She's quiet and timid as a mouse, and wonderful about the house." Whereas, a sheik would say right now: "I'll tell the world my girl's a wow. A classy bid, full full per. Yuh ought to see that baby sleep."

Letter Was Delivered
 A remarkable incident has been reported—the case of a child at Houston, Texas, who addressed a letter to Santa Claus to Northland, Canada, and the epistle through the efficiency of the American and Canadian postal employees, reached Northland on the A.C.R., 24 miles north of the Sea.

Twenty-two pounds of sugar can be made from a bushel of corn by a new process used by the Department of Agriculture.

Bamboo is the latest material for making paper. Bamboo, long regarded as a weed in India, has become an important commercial product.

BAYER

Genuine

ASPIRIN

Proved safe by millions and prescribed by physicians for

Colds Headache Neuritis Lumbago
 Pain Neuralgia Toothache Rheumatism

DOES NOT AFFECT THE HEART

Safe

Accept only "Bayer" package which contains proven directions. Handy "Bayer" boxes of 24 tablets. Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacturing of Monoclinic acetylsalicylic acid (Aspirin) Bayer AG, "A. S. A.". While it is well known that Aspirin is a Bayer manufacture, to avoid the public being misled, the Tablets of Bayer Company will be stamped with their special trade mark, the "Bayer Cross".

Children Cry for

Fletcher's

CASTORIA

MOTHER:—Fletcher's Castoria is a pleasant, harmless Substitute for Castor Oil, Purgative, Teething Drops and Soothing Syrup, especially prepared for Infants in arms and Children all ages.

To avoid imitations, always look for the signature of *Wm. C. Fletcher*. Proven directions on each package. Physicians everywhere recommend it.

Extracting Chemical Compounds From Coal More Valuable Than Heat From Combustion

Scientists are predicting that within a generation a new coal age will replace that prevailing for the last six centuries when men have known nothing better than to burn coal as it came out of the mine. Experts of various countries who attended the recent international conference on bituminous coal held at Pittsburgh agreed on this, and their conclusions open another chapter in the thrilling romance of achievement. Chemists, mining engineers and fuel experts all saw the world on the threshold of a new era in fuel realization when it will be deemed a criminal waste to burn raw coal as fuel instead of extracting the chemical compounds that are far more valuable than the heat produced by combustion.

The conclusions of the world's coal experts open a new wonderful world of science which, from a commercial point of view, will surpass the marvels of radio communication. They prefer to man relief for centuries from the problem of motor fuel, with a product superior to gasoline and far cheaper. Their scientific dreams, which must be translated into commercial fact, will eliminate the tremendous waste in burning the raw coal, the huge cost of transportation, the evil of the incombustible by-products and the mounting cost of coal delivered in the big cities. This modern wonder will be accomplished, it is predicted, by a process of pulverizing coal to the consistency of talcum powder so that it becomes a fluid when heated and runs like water. Then will come the use of the fluid instead of gasoline in internal combustion engines. That this is not limited to a prophetic future is evident from the announcement that before long automobile engines will be testing the new fuel. France already has experimented extensively with alcohol derived from coal.

With coal treated as a liquid instead of a solid, the coal industry and technique must undergo a complete change, according to the scientists, who declare that the mining of coal, transportation, burning, carbonization and gasification will be affected. It should follow that the nation no longer will be compelled to pay an excess tax cover the cost of production at the poorer mines under existing conditions. The rocky outlook was summed up in the following terms:

"Because coal can be purified, because it can be pulverized to minute sizes, because it can be distilled at high thermal efficiencies to produce oil, gas and carbonized powder, because it can be made to flow and to pump, because it represents the most efficient methods for the creation of mechanical energy, the world may look forward with confidence to a new era of coal, greater and more permanent."

The iron age has been supplanted by that of oil, which will continue indefinitely. The source of that oil may later be a cause of world concern, however, as the liquid fuel is drained from the known fields. But the magicians of science are preparing to wave their wands over the tremendous coal deposits and assure to man a fuel supply for the coming centuries.

An Unusual Experiment

Professor Is Testing Sleeping Brain For Learning Power

A University of Minnesota psychologist is seeking to determine whether learning can be acquired in sleep. Prof. W. T. Heron is conducting the experiment on himself. He has rigged up a telephone with an electrically driven phonograph so that sounds are conveyed to his ears by headphones. The contrivance is so arranged that when he releases his grip on an automatic switch, as he falls asleep, the phonograph starts operating softly.

"Whenever I awaken, the renewal of the grip on the switch will immediately stop the machine," says Heron. "In this way I will be sure that I will not hear the material in the waking state." "It does not seem to be beyond the realm of possibility that the human being may learn, at least to some extent, while asleep."

W. N. U. 1602

Color Photography

May Be Useful In Throwing Some Light On Conditions On Mars
Color photography may throw some light on conditions on Mars. Whether Mars has an atmosphere, with its important bearing on the possibility of life on the planet, long a scientific question, may be settled by experiments with color photography. In an article written for the Astrophysical Journal, Prof. F. E. Ross, of the University of Chicago, a member of the staff at Yerkes Observatory at Williams Bay, Wis., says that "pictures taken by the use of colored lights, notably the long infra-red, penetrate the atmosphere surrounding the planet and produce a much better picture than when ordinary light is used."

New and Attractive

The dolman sleeve gathered into a cuff is decidedly of the latest mode in this smart one-piece dress. The skirt has an inverted plait in each side seam, thereby allowing for the necessary fullness. The collar may be worn high or low. Buttons adorn the neck at collar opening, and on sleeve cuffs. No. 1451 is for ladies and misses and is in sizes 16, 18 years, 36, 38, and 40 inches bust. Size 36 requires 4 1/2 yards 36-inch material or 3 1/2 yards 54-inch. 20 cents.

The secret of distinctive dress lies in good taste rather than a lavish expenditure of money. Every woman should want to make her own clothes, and the home dressmaker will find the designs illustrated in our new Fashion book to be practical and simple, yet maintaining the spirit of the mode of the moment. Price of the book 10 cents the copy.

Time to Get Busy

There is a lot of truth in the statement that the psychological time for a country to launch an aggressive colonization campaign is when her agriculture has definitely entered the upward swing. It looks as though Canada had better get busy.

Character is the inside decoration of man; reputation is the whitewash on the outside.

Menaces To Navigation

Maritime Patrol Keeps Ocean Lanes Free From Obstructions

Wildly seas quietly lap the shores of the world, a vigilant maritime patrol, unknown to most "landlubbers," busily stalks the silent but treacherous foe to commercial shipping. Icebergs, floating debris, land abutments, drifting buoys, derelicts and opaque fogs are constant menaces to navigation against which war must be waged. The nerve center of operations the world over is the Hydrographic office of the navy department. This bureau "tries first of all to keep a finger on the whereabouts of all dangers to shipping about which it is imperative, in safety's cause, to know. An elaborate intelligence service, enlisting co-operation of hydrographic services of other countries, assists the bureau to chart known impediments to water traffic, and send out warnings.

Constant communication with ships at sea, advising them of newly sighted derelicts, rafts and other things is maintained. The bureau supplies all navigators with information and asks their reciprocation by advising of the longitude and latitude of icebergs and other stragglers. It immediately disseminates the news over all ocean highways.

Meanwhile the navy and coast guard amphibious squadrons are notified and extra duty to visit the scenes of drifters and remove them.

New Ferryboat Revolves

Has Been Developed To Dodge London Water Traffic

A ferryboat which does everything except tow its own whistle has appeared at the Royal Albert docks. It does more than any ferryboat has ever done before, and does it all without either rudders or propellers.

It goes forward and backward with equal speed and ease. It spins on its own axis like a top. It sidesteps with the same facility.

The power plant consists of a powerful pump. Under the hull are four large pipes, two longitudes with the keel and two at right angles.

The pilot can turn the stream of water from the pump out through any of the large pipes which he chooses, and the rush of water from the pipe drives the ferryboat forward or back or sideways in any direction. By using two pipes, the boat can be made to revolve without moving ahead.

Lands Plane on Mountain

To demonstrate that it is possible for aeroplanes to land on small spaces, John Leeming, of the Lancashire Aero Club, alighted on the summit of a mountain near Windermere, Eng. His landing was made on a small summit about 600 feet by 20 feet on Mount Holvellyn, rising to a height of 3,118 feet, in the English lake district.

The more experience a man has in making resolutions, the poorer the quality he turns out.

It takes a woman who doesn't know how to do a thing to do it better than a man who knows all about it.

Canadian Cattle Greatly Favored For Many Excellent Qualities By Buyers On British Market

A Siberian Joan of Arc

Widow of Young Officer Killed by Bolsheviks Dedicated Life to Free Country

A Siberian Joan of Arc has suddenly appeared in Siberia, causing the Soviet Government much trouble and some disquietude, according to advices from Moscow.

For some time an ever-increasing band of raiders under a chieftain known as Hetman Orlov has been raiding Siberian railway points and harassing Red army outposts. Orlov attained an almost legendary fame for the suddenness of his attacks and his daring escapes.

Orlov has now revealed himself as a young woman named Jenana Senina, wife of a young officer who was killed by the Bolsheviks. She was terribly mistreated. Recovering, she swore to dedicate her life to revenge.

She has been arousing the passions by telling them the Virgin Mary appeared and told her to free the country from the Bolsheviks. She recently raided a military arms and munitions transport train by which she was enabled to arm her increasing number of followers.

Greater Use Of Eggs

New Idea Used To Promote the Sale of Eggs

A new idea to promote the greater use of eggs has been adopted by the poultry division of the Dominion department of agriculture, Ottawa. By means of circulars apls about seven inches long by two and a half inches wide, attractive paragraphs on eggs and their uses are given. These apls are the correct size to pack in egg cartons and some two dozen samples, each differently worded, have been sent out by the department.

The variety of ways in which eggs may be used and their dietetic value, together with the reason why only "graded" eggs should be purchased, are given.

These series of paragraphs on "Eggs for All Occasions" should become popular amongst merchants and retailers and a catalogue will shortly be issued by the department, giving full particulars.

Canadian Wool For Britain

The last steamer to clear from Montreal before the close of navigation for the present season, carried a shipment of 70,000 pounds of graded wool from the Canadian Co-operative Wool Growers to Liverpool. This was the largest shipment of wool from this country to England in 1936.

Some people waste a lot of energy climbing mountains before they are even in sight.

A girl suppresses the crying habit when it begins to make her nose red.

Quartette of Champions

The sporting eyes of the continent were turned towards the Canadian Pacific's new golf course, Langara, at St. Vancouver recently, when Walter Hagen, golfing ace, went into action in an attempt to break the par of the 18-hole golf course. He fell a little short of this accomplishment but the event was outstanding in the sports history of the Pacific coast and drew many notable

witnesses from other fields of sport fame. Babe Ruth, the king of the baseball world; Suzanne Lenglen and Vincent Richards of tennis fame, were interested spectators. The above photograph was taken on the roof garden of the Hotel Vancouver where these celebrities were guests, and shows from left to right: Vincent Richards, Babe Ruth, Suzanne Lenglen and Walter Hagen.

Like cattle from Canada that have come to the British markets: during the past few years have created more than average interest among buyers. "It is chiefly because, in addition to the highly good type, conformation, and condition of flesh, they possess a remarkably good record of health," states W. A. Wilson, agricultural products representative for Canada. "Post-mortems seldom reveal even a trace of disease, and in this respect our cattle are practically in a class by themselves. It means that no offal is condemned by local health authorities, and the butchers' profit is not, therefore, interfered with. The trade in these by-products is important, and when butchers can figure on getting cattle that have sound livers, etc., that can be sold at a profit, naturally they want to buy them, and the Canadian sale rings offer the opportunity."

The farmers who buy feeders have also heard of the advantage of vigor and health in Canadian cattle, says Mr. Wilson. A healthy and good foundation for immediate gain in weight, appeals to them, because it means rapid turnover and profit on their investments. It also reduces the risks of having one or more animals that do not show gains in weight. If the percentage of this class of bullock is high, heavy losses may follow, consequently the buyer tries to select as carefully as possible in order to escape this risk, and not a few learned how well the Canadian cattle meet the situation.

"We do not occupy quite the same enviable position with regard to the type and conformation of our cattle in comparison with some others, but at the same time they compare well with many cattle," says Mr. Wilson. "That, however, offers little, if any, justification for having only an average or medium standard for type and conformation to our credit. There is a good deal of variety evident in our shipments, and the comparatively small percentage of undesirable discounts below the sale price of the lot and the reputation of the Canadian bullock as a whole. The importance of a national reputation for any commodity can scarcely be over-emphasized, and if we could bring the quality of all our export cattle up to the standard of the best 25 per cent. now shipped the average value would be noticeably higher, the demand would be noticeably greater and our reputation noticeably better."

Not all buyers are enthusiastic about Canadian cattle because there are dealers, butchers and feeders who have interests, direct and indirect, elsewhere. They are out to safeguard these interests, and the arrival of a few undesirable bullocks offers the opportunity for an effort to discredit the lot. In Mr. Wilson's opinion, the best way to avoid criticism is to select carefully the cattle for stall-feeding or pasturing in Canada, and, with a similar selection of store cattle, the basis of the criticism can be wisely removed.

Had Branches of Gold

Costly Christmas Tree for Family of Klondike Millionaire

Perhaps the most remarkable and certainly the most costly Christmas tree ever provided was that which graced the apartment of a Klondike millionaire at a New York hotel. Its every branch was loaded with gold nuggets, and around the trunk was planted a large pile of \$20 gold pieces. Altogether the value of this tree was between \$60,000 and \$65,000. He was a young man who had just returned from the Klondike, and provided this unique Christmas tree for the amusement of his wife and children. Before going to the Klondike he was a poor brakeman on the Southern Pacific railway.

Qualities that make a man feel superior are usually those that cause his acquaintances to rate him as inferior.

In Tibet it is the custom of natives when meeting friends to stick out their tongues as a mark of respect.

New Discoveries, Important

"From the other end of the earth—
we would send for Zam-Buk,"
writes Mrs. J. C. Lemon of 1102.
East Broadway, Glendale, Calif.,
U.S.A. "In Ontario 20 years back

X-Ray Films—Reveal Processes of Human Body

A method of taking X-ray films of the processes of the human body has been discovered by three British scientists, it was declared. The problem, which has long baffled American and European scientists, has been solved by Frederick Melville, radiologist at the University College of London, and E. E. Warnford and E. W. Edwards of the British Instructional Films Company.

As a result of this new invention the public soon will be able to see films showing the beating of the heart, the respiratory movements of the lungs, and the various stages of the digestion of food.

we used it and we took supplies on with us to Michigan. Now we have Zam-Buk sent on to California.

"Zam-Buk is proved a sure remedy for skin troubles. I recall how when we lived in Canada my daughter burnt her face badly against the stove. Zam-Buk healed the sore in a few days. On another occasion my husband injured his face. The wound went the wrong way and blood-poison made the flesh purple. When we got Zam-Buk on to the foot it spoiled, cleaned and healed it in very short time. Promptly used, Zam-Buk prevents burns going deeper, and aches and pains of all kinds. A sure guard against infection.

"Zam-Buk is a good pool in so many instances in our family that I don't know how we could get along without it."

"We don't get along without Zam-Buk."

Whenever skin is cut, burnt, sore, inflamed or "broken" in any way, Zam-Buk is always the sure and certain remedy. Pains healed too fast for \$1-25 each dealer.

"IDEAL
fashions
by
Yves Delorme Hamilton

The method is said to be precise; the same as when ordinary motion pictures are taken, except that X-ray film is used. The scientists, however, do not disclose the secret of the method, by which, as the sequel of two years' experimentation, they have overcome the difficulty of obtaining sufficiently strong illumination without injuring the tissue. The subject is declared to be of the greatest importance from a medical viewpoint both for teaching and research. Physiologists will be able to obtain exact information about many procedures which thus far have been judged only by inference.

We should love our enemies, but Dr. Shaller Matthews is right in saying that love for our enemies is not moral if it deadens our indignation against the crimes they perpetrate.

Good Reasons For Advertising

To Encourage Fur Farming

Marsh Lands in Saskatchewan Now Available for This Purpose

Negotiations between the Saskatchewan and Dominion governments regarding the leasing of marsh lands

A black and white line drawing of a man and a woman. The man is in the foreground, wearing a long-sleeved shirt with a geometric pattern and a dark tie. He has short, wavy hair and is looking slightly to the left. The woman is in the background, wearing a short-sleeved dress and high heels, walking away from the viewer.

**REGAINED HEALTH
IS NOW HAPPY**

The Experience of a Quebec Woman With Dr. Williams' Pink Pills

Mrs. L. D. Bernier, 89 D'Arguille street Quebec, is one of the thousands of women who, when she found her health failing, resorted at once to Dr. Williams' Pink Pills, and now find herself in perfect health. Mrs. Bernier says—"I was so weak, subject to headaches and was unable to sleep well. Testimonials in the newspaper persuaded me to try Dr. Williams'

That Should be Convincing

An enumeration of the reasons for advertising has recently been given out, says the Kingston Whig-Standard. There are eight reasons advanced, but there are many others, of course. However, here are eight that are very splendid and highly convincing, as given in a southern newspaper:

Newspaper reading is a universal daily habit; newspaper, therefore, reaches each day virtually all who buy.

Newspaper advertising is the life blood of local trade because it touches all consumer sources in every com-

for far farming purposes have now been completed and arrangements are being made by which the provincial authorities will lease certain crown lands for far farming purposes. Hon. the Minister of agriculture, has announced

Large areas of marsh lands owned by the crown are available for far farming in the northern part of the province, but the area of such land in the south is relatively small, the water courses being more or less limited and homesteading having been carried on extensively.

Completion of the negotiations between the federal and provincial governments, means that a profitable pay

1397

School Smartness for the Young Girl

The frock illustrated gives you an idea how smart a school frock can be when made from flannel, with just the right touch of contrasting color used for collar, cuffs and belt. There is an inverted plait at each side of the skirt front, and the back is plain. The narrow belt fastens with a button at each plait, while the long sleeves are gathered to cuff bands. No. 1397 is in sizes 6, 8, 10, 12 and 14 years. Size 8 requires 2½ yards 29-inch material and ¼ yard contrasting. 20 cents. The flannel style of smart approval may be

Pink Pills, and the result has been most satisfactory. I have regained my health, E. headaches have left me; I sleep well at night, and I am gaining weight. Naturally I am feeling better.

Williams' Pink Pills to all weak blood.

Try Dr. Williams' Pink Pills for anemia, rheumatism, neuralgia, nervousness. Take them as a tonic, and you will feel like a new man. Analyze and cultivate a resistance that will keep you from being attacked again. Write our name and address a HIT box "Building Up the Blood," will be glad to send you a bottle containing many useful health hints.

You can get these pills through any druggist or by mail direct from The Dr. Williams' Medicine Co., Brockville, Ont.

Magistrate:"You say he said you had the face and habits of a monkey, and that he could make a better mirth than you out of chewed string? What happened then?"

Answer:"I never became abusive."

For Good Health and Stable—There is a good deal of similarity, physical and speaking, between monkeys and men. But their animals both are subject to the same ailments. Both are subject

lity. It gives the national advertiser the same opportunity for complete consumer appeal in any locality without incurring extra selling costs because it entails no waste in locality of circulation. Manufacturer can use it to cover markets where it is profitable to do business. Newspaper advertising insures quick, thorough and economical distribution and dealer goodwill, because retailers are willing to sell products advertised direct to their own customers.

Newspaper advertising enables manufacturers to tell where their products may be bought.

Newspaper advertising can be started or stopped over night, can be proportioned to meet certain advertising needs, and to obtain immediate results.

Newspaper advertising enables manufacturers to check advertising results.

Newspaper advertising costs less than any other kind.

The merchant or other business man who takes advantage of the opportunity

now received by the Saskatchewan authorities from individuals desiring to take up such lands for fur farming.

Constantine claims 20 of the 89 newspapers published in Turkey. Tur total daily circulation throughout Turkey is given as 171,406 copies.

**Children Like It—
So Will You**

At the first sign of a boy "buggy-eyed." The doctor does two things. He gives the "buggy" plenty of light and tells him to look at the stars. If he doesn't get better, he gives him some Cod, Brockschick's Preventive Tablets. All boys like them. They are good for Longs, too. Sold everywhere without reference to prescription.

NO AMBASSADOR FROM AUSTRALIA TO UNITED STATES

New York.—"I do not think the time is ripe for the appointment of a minister to the United States, and believe that Australia is well served by the diplomatic corps of Great Britain, without engaging in that expensive amateurism herself."

So declared Premier S. M. Bruce of Australia, on his arrival in New York from Europe.

Even the possibility that South Africa may follow the procedure of Canada and Ireland in the appointment of ministers, Mr. Bruce said, would not gauge the program for Australia. He said that there is excellent reason for the naming of ministers from Canada to the United States as their adjoining boundaries had their railways and other problems arising from their proximity to each other are frequently best met by diplomatic negotiations. He said the relations between Australia and the United States are at present on more of a trade basis than a diplomatic one, and for that reason a commissioner best served the purpose.

Mr. Bruce said that among the matters he would invite discussion upon when he visits Washington, and which he would negotiate without the aid of any factors save those of good fellowship, would be the one of lengthening the period in which Australian businessmen may visit in the United States without, as he expressed it, awakening one day to find the horrible moment is upon them when they must leave the country."

Woman Will Compete In Quebec Dog Derby

Announces intention of Driving Ten Labrador Huskies

Quebec.—Mushing through Canadian snows behind a snapping, growling, jostling dog team is a man's job but when the famous Quebec derby gets underway this winter, for the first time in the history of the derby, a winsome resolute woman will line up at the starting post with "Canada's best and hardest."

Mrs. Frank A. Wheeler, of North Conway, Mass., has written the officials in charge of the event here, asking for full particulars as to the running of the race, and also for an entry blank.

Mrs. Wheeler has a team of 10 Labrador huskies and expects to finish in the prize money.

Another outstanding figure in the dog world who may also take part is Sepalla, one of the 400 mile nonstop trip to Nome, Alaska, a couple of winters ago, when he mushed that distance with his dogs carrying a load of serum to save the inhabitants of the little mining town from diphtheria.

Sepalla is going to run in the New England dog derby, to be run at Berlin, February 19, 21 and 22, and efforts will be made to have him come to Quebec up for competition here, too, and have a try at the rich stakes.

Will Continue Arctic Exploration Work

Captain Wilkins Leaves Seattle for North Pole February 5

Detroit, Mich.—To pick up his Arctic exploration work where he left off last spring, Captain George H. Wilkins plans to leave Seattle for the north on February 5.

Two aeroplanes, the Alaskan and the Detrolter, are stored at Fairbanks, and Captain Wilkins plans to place the wings of the Detrolter on the fuselage of the Alaskan and then fly from Fairbanks to Point Barrow. At the latter point 2,500 gallons of gasoline has been stored in preparation for the flight towards the North Pole.

A series of mishaps delayed the start of the expedition last spring until weather conditions made Arctic flying impossible.

Miner Is Killed
Drumheller—W. Breton was killed between two cars at the Western Gem Mine about 7 o'clock Monday evening. His people live at Warfield, Alberta.

Specialist Dies At Sea

Dr. Ross Had Done Valuable Work in Cancer Research

London.—Dr. Hugh Campbell Ross of London, director of the McEwen Research Foundation, who had done valuable work in the investigation of cancer, died at sea on his way to England, aboard the liner Narkunda. He was buried at sea.

Dr. Ross, having been at the head of the McEwen organization, was Director of the Lister Institute of Preventive Medicine. He was 51 years old, a son of Sir Campbell C. G. Ross, K.C.B. He served in the South African War as a surgeon. While medical health officer at Cairo, under Lord Cromer's Administration in Egypt, he started mosquito extermination there. Since 1910 he had been occupied chiefly with cancer researches at the two institutes of which he was director. Several new methods of research were developed under his leadership. He devised several processes for the prevention of industrial cancer.

Gasoline Was Fatal

Constant in Far North Lanes Life Through Using Gas for Lighting

Edmonton.—According to word received here from the far north, Constable Frederick Rhodes of the R.C.M.P., used gasoline to light a fire in the barracks at Fort Rae, resulting in his death and injuries to Constable P. L. Armstrong. News of the tragedy was given out at police headquarters in Ottawa, Monday.

Letters from Fort Rae state that Rhodes was lighting the fire and poured some gasoline on the smoldering wood.

A four-gallon can he had in his hands exploded and enveloped him in flames which Armstrong vainly tried to quench. Before he could even get Rhodes outside the buildings were a raging inferno, and everything the men had was destroyed.

Russia Will Build Rainmaking Machine

Factory for This Purpose Being Built at Leningrad

Leningrad.—A factory for building rainmaking machines is under construction here. The Leningrad Meteorological Institute recently sent a rainmaking expedition to the remote Trans-Caucasian farming station of Ganjli, to make careful experiments in rain production. On the basis of this expedition's report of great success, construction of the factory was begun. Further tests in the Mugan steppe and in Central Asia are being made. The nature of the rainmaking method and the character of machinery necessary to produce rain on demand has not yet been explained.

Grain Rates Case

Privy Council to Hear Appeal of Western Provinces

Edmonton, Alta.—Premier Broderick has been advised from Ottawa that Jan. 19 has been set as the date on which the privy council of Canada will hear the appeal of Alberta, British Columbia and Saskatchewan, in connection with the grain rates discrimination case. This is the outcome of a finding by the board of railway commissioners in which the board tried and was unable to give a definite decision, proposing that the case be held over until the general freight rates investigation has been disposed of. The three provinces joined in an appeal to the courts for an order directing the board to give a decision.

Alberta Power Problem
Calgary.—Premier Broderick of Alberta, Hon. Charles Stewart and probably Mayor Webster of Calgary, will meet in Ottawa between January 5 and 8 to discuss settlement of the power problem of Southern Alberta, according to information received by Mayor Webster from Mr. Stewart. Among other matters that will be taken up will be that of hydro-electric power development from Spray Lakes in Banff Park.

Decrease in T.B.
Washington, D.C.—Americans are dying considerably less rapidly than in the past from tuberculosis, pneumonia and cerebral hemorrhages, but the accompanying more frequency to heart affections, cancer and kidney disorders.

DENY ANY CHANGE IN IMMIGRATION LAWS OF U. S.

Washington.—No unusual tightening of immigration restrictions along the Canadian border has been ordered by United States immigration officials. Immigration Commissioner Hull said, but the point out that plans are being prepared to prove their right of residence when they go out and enter.

"Unless they have some evidence to submit to immigration inspectors that they are legally entitled to live in the United States," he said, "they are likely to meet trouble and delay. At the very least, they must be able to give information as to the ports through which they first entered this country so that our records can be looked up to make the matter certain."

A despatch from Vancouver said a number of British-born residents of the United States who went to Canada for Christmas had found themselves barred from returning to the United States because of a sudden tightening up of immigration laws. The despatch said many had businesses in Pacific Coast cities and that protests and appeals had been forwarded to Washington.

Leave on Mystery Survey

Reason for Engineer's Trip North of the Pas Not Known

Saskatoon.—A despatch to the Saskatoon Star from The Pas states that a mysterious survey party consisting of three engineers, 30 men, six teams and 24 tons of supplies has left presumably to spy out the country between the Lithuanian river, on the Hudson Bay Railway projected route, and Fort Churchill.

While definite information could not be obtained, it was understood at The Pas that a possible route for a short line connecting the present Hudson Bay route to Port Nelson with Fort Churchill would be sought.

Opposes War Debt Agreement
Saskatoon.—Former Premier Millerand is fundamentally against ratification of the Washington agreement for funding the French war debt to the United States, he declared in an interview with L'Avant on the eve of launching his campaign for re-election to the Senate.

Black Plague in Russia
Irkutsk, Siberia.—An epidemic of black plague taking a hundred per cent mortality toll has broken out on the Mongolian steppe near Irkutsk. The Government has sent a medical expedition to the stricken area.

Honor Canadian Pacific Liner

When the Canadian Pacific liner Melita steamed into the harbor of Antwerp towards the middle of November, it was the occasion of a great celebration; for she was the 10,000th ship to enter the Belgian port this year. Never in the history of the port has such a record been established. King Albert of Belgium, upon hearing the news, wired his sincerest congratulations to the Burgomaster of Antwerp. The entire city rejoiced and celebrated. Hugo Goossens cheered Captain A. H. Nottley of the Melita

Eckner Will Attempt Non-Stop World Flight

Plans to Use New Zeppelin Now Under Construction

Friedrichshafen.—Dr. Hugo Eckner will attempt a round-the-world non-stop flight with the Zeppelin LZ-127 as soon as it is completed and tested. It has been learned. The progress on the new machine enables the prediction to be made that it will leave its hangar for the first trial flight about the middle of June, and should be ready to encircle the globe during the autumn.

Dr. Tempert, a chemist of the staff of the Zeppelin Works, warrants the utility of the new airship, which will be 50 per cent larger than the Los Angeles. A new invention, which is being guarded with the greatest secrecy is said to guarantee the greatest safety. Special attention is being given to the radio equipment, with which it is hoped to keep in constant touch with the earth and from which steering directions will be given.

Though the ship will follow the proposed Seattle-Buenos Aires line and go thence over the Pacific Ocean, there is a possibility that no landings will be made, since a new light fuel gas instead of heavy gasoline will give the Zeppelin a cruising radius of 90,000 miles. Successful tests of the new gas fuel have been made with the Maybach motors.

At present the Zeppelin Works are engaged in putting in the ship's ribs of duraluminum. Gondolas and other important parts have already been completed. After the world flight the ship will be put in European-South American service.

Friendship With Japan

General Booth Advocates Drawing Together of Eastern and Western Nations

London.—General Bramwell Booth, head of the Salvation Army, returning from his world tour, declared that he could see no greater blessing to the world than the drawing together of the eastern and western nations. Ten thousand salvationists gathered in Albert Hall to welcome their chief home. He described his travels and experiences, and admonished his hearers.

"Let us cultivate friendship with Japan, for friendship with Japan is worth to our nation more than any amount of armament."

Manitoba Oil Well

Yorkton.—Twenty barrels of crude oil from the Ross well in the Grandview, Man., field were shipped to Winnipeg recently. The oil will be used for exhibition and advertising purposes. It is the first crude oil ever shipped from either Manitoba or Saskatchewan he claims.

RUM EXPORTERS MAY BE DRIVEN OUT OF BUSINESS

Vancouver.—Although refusing to concede that seizure by Canadian customs of a \$350,000 liquor cargo on the auxiliary schooner Chris Moeller will establish a precedent governing future shipments, Vancouver liquor exporters are perturbed, according to the Province.

They see the hand of the Canadian Government extended to help the United States enforce its prohibition laws; and they fear that Dominion customs officers will in this endeavor emulate practices of American liquor enforcement authorities so that what it is impossible to accomplish according to the letter of the law will be brought about indirectly.

To be more explicit, they say that the Chris Moeller seizure heralds costly litigation, which, with other hazards of the business, would financially ruin exporters and make jobs same not worth the candle. They are up against heavy expenses south of the international boundary, they point out, and if confronted with the same situation here there will be no profit in the business.

When exporters speak of emulating practices of American liquor enforcement authorities in their mean that the latter seize, for example, a rum-running ship 20 or 30 miles out at sea, where she has a legal right to be, and then institute prosecution with all its incidents of heavy bail and expensive lawyers which, in the end, breaks the morale of the owners.

Harrassed on both sides of the line, liquor exporters may be driven out of business. The more certain prospect of losses and of protracted litigation are both factors which they are considering.

Prairie Air Mail Service

Conditions in Western Provinces are Ideal for Experiment

Edmonton.—Air mail service for Canada is very probable in the near future, and with an air route already in existence, Edmonton will likely be one of the first cities served in this respect in the west, said K. A. Hatchford, M.P. for East Edmonton, following receipt of a letter from the Postmaster-General of Canada relative to air mail.

"The Postmaster-General has the matter under consideration at the present time, and it has been pointed out to him that there is no better place to experiment with an air mail service than on the prairie," said the East Edmonton member.

Air force officers from High River Field will be in Edmonton early in the new year to carry out a series of experiments in connection with winter flying, and according to air force experts and postal authorities there is little to hinder the establishment of an air mail service across Canada.

Trans-Atlantic Telephone

Fee From London to New York Will be \$75 for Three Minutes

London.—Trans-Atlantic telephone service which is to be available to the public early in January will cost £15 (about \$75) for the first three minutes of a call and £5 for each additional minute, it was announced today by the postmaster-general.

Wrong numbers won't count, however, and unless the London "hello girl" gets the particular person asked for in the New York area, to which the service is limited at present, the charge will be £2 for making the attempt. Calls will be limited to 12 minutes when others are waiting to talk across the ocean.

Ratified by Senate
Mexico City.—The Mexican Senate ratified the British-Mexican claims convention for revolutionary damages suffered by British subjects from 1910 to 1922. The Senate also amended the existing treaty of commerce between Mexico and France.

U.S. Steamer Founders
Paris.—A telephone message by way of Berlin to the Paris Midi says the United States steamer Astoria has foundered in the Black Sea, near Kaynar, Rumelia, with the loss of 21 lives.

Vie For Supremacy of Road

1. Modern tractor-trailer in Canadian Pacific Express service.
2. "Ben," the prize of the Canadian Pacific Express stable.

Is the horse doomed to extinction so far as the road is concerned? A few years ago it would appear incredible that the motor truck should supplant the faithful servitor as much as it has. Tractors are endeavoring to edge him off the field too; how long can he last?

We have become so modernized—those of us who buy gasoline—that we are gradually coming to regard the old grey mare with more or less disdain. When we think of horses in terms of transport, we are becoming more inclined to picture them staggering before a junk wagon or haltingly mobilizing a caliche or cañero, these beasts of whom so much has been written, whose devotion and faithfulness has inspired poets and artists. J. M. Coulter, assistant to the vice-president of the Canadian Pacific Express Company gave us quite a shock recently. He drives a car which is paid for, uses considerable of the company's gasoline and had just completed the purchase of six new trucks—beautiful things—of which he is very proud. "The horse," he said, "the horse will never be altogether replaced on the road, and I will live to see the day when he will replace some of the trucks". And then he waxed eloquent. We could see that he had been born fifty years earlier—"Ed" is a very young man—the Canadian Pacific would have had some of the "matted turnouts" possible. Coulter has over two hundred motor vehicles to keep close record

of, but he says that his company will only replace a horse where it is proven that an actual economy will be effected. "On long runs, where two horse wagons have not quite enough work to keep them both busy a motor vehicle will perhaps be more economical, but one motor vehicle, he said, will not economically replace one horse in our service, and particularly in congested areas where many stops must be made". This from a man who lives by efficient transportation.

Mr. Coulter believes that part of maintenance of horses, wagons and other vehicles should be charged to advertising. That is why one never sees one of the vehicles under his direction in need of a coat of paint. He has been able to keep in his stables too, that pride in horse-flesh that was almost a feature of life fifty

years ago. Not all of his horses are young ones, but most of them have a record of some kind or another, and when they are finished with express service, they are given the 1/10 of ease they have earned. In the Toronto stables is one horse of which the whole organization is exceptionally proud. "Ed" Coulter will tell you about this fine grey gelding and of how he compares with the late "Marquis". The champion "Ben" joined the service of the Canadian Pacific Express Company three years ago and has worked eight hours a day since. In 1924 he took first prizes in the July parade and the Royal Winter Fair. At the last Royal Winter Fair he took all honors again. Another "Marquis" is the judgment.

The horse will never be ousted, at least from the hearts of the express men.

CHAPTER XXII.—Continued

"What do you mean by that?"

"Only my careful deductions, my dear. I know you too well not to have my conclusions, even every now and then, make. You've been so deliberate in your play that I know you can afford to take your time. That, to me, means you're holding a trump of some kind. I won't ask you if I'm right, for of course you wouldn't tell me—the truth anyway."

He answered smilingly, but Joanna had conquered herself and shut the voices away from her. She recovered her composure and went toward the house.

CHAPTER XXV.
Old Memories

In the house Joanna called her butler and inquired if any messages, telegram or cablegram, had arrived for her. The servant assured Mademoiselle none had. If John was coming, or, as she understood from the conversation she had overheard, he was already some place near in the South of France, he had sent her word.

She knew he was in London. He had written from there, his usual letter, glowing with the details of his reception by British aristocrats, telling of some of his plans, and, restrainedly, affectionately. He had said he would "run down" to the Mediterranean soon, but had mentioned no time. She made sure of this omission by hunting up his letter and reading it again. She heard Yvonne come in from the grounds and found a reason for seeking her. They had not been together since the closing hour of the affair at Prince Michael's the night before. They had returned to Villa Ametie in different parties and Joanna had relied at once.

Yvonne seemed to nourish no memory of what must have been her chagrin when the whisper went around at Michael's that the Golden Girl had stolen the prince away to a rendezvous that required less possibility of intrusion than that afforded by many palm-lined nooks on his own estate. She talked of some of the details of the night before, and didn't mention

Salaries of Aviator Postmen
In Addition to Regular Pay They Receive Mileage

The lure of flying holds its monetary reward, at least for the air mail pilot. The aviator postman receives an annual salary of between \$4,000 and \$9,000. The high pay, plus the desire for excitement, recently caused two field superintendents of the service to desert ground jobs and return to piloting. Both now fly on regular mail routes.

The mail pilot receives a base pay of between \$2,000 and \$3,600, depending on length of service, and is paid in addition by the mile for flying service. For daylight flying he receives a five-cent rate between Cleveland and Cheyenne, six cents between Cheyenne and Reno, and seven cents between Reno and San Francisco. For night flying the mileage scale is doubled.

The hazards of mail piloting are paid by postal officials to justify the pay.

Children's Colds

Are best treated with Vicks VapoRus

ing such a commotion just now? Will more, John Wilmore, I think it is, sufficient importance for my esteemed journal to announce his arrival at Monte Carlo. Extraordinary commitment, what with so many dukes and their duchesses, right and left handed, arriving daily. And I right Mademoiselle! Have I heard his name and yours together?"

Joanna answered quietly. "It is possible. You hear so much about names being linked together, down here." She smiled at him quizzically. He laughed pleasantly. Prince Michael was always present, this Russian who found nothing in his thirty-five years to make him other wise except on such temporary occasions as when unwitting in some amorous adventure. It was a pleasant thought, that impressed as a mark. The night before Joanna had known quite well, there would have been no wedding formalities, if she had found herself in Genoa with him.

"What else would you have?" he wanted to know. "We have no wars to fight and no back to do. There is nothing left but pasture. People used to write poems and read Shakespeare. I think they had it. Today we invent pleasures to be built upon by our senses. That's more reasonable and it involves a learned knowledge of who belongs to who and what the chances of taking her away from him? But we were talking of this architect fellow. Tell me about him, please. Seems to enjoy working at some thing."

"You'll have to satisfy my own curiosity first," Joanna declared. "Perhaps you'll send me the 'esteemed journal.' I'd like to know what is being said of him. He's very young, still fighting under him. I saw him last."

"An attention, quickly," produced a copy of L'Echo which bore the morning's date. Michael pointed to a paragraph in the column of the new arrivals at the various resorts along the fashionable coast. Both Rodolph and Yvonne watched her furtively when, with a murmured "Pardon," he fastened her eyes on the short item.

"Among the bookings on the Blue Express at Cannes yesterday was the distinguished young American architect, John Wilmore, who comes from a visit to London for an indefinite stay. He has made reservations at the Les Palmiers. Wilmore's recent achievement of fame has been extremely interesting. It is understood that at year or so ago he was unknown. American capitalists suddenly appreciated the great value of his design conception of a vast memorial in which are included some startling conventional features which have caused international discussion among artists and scholars generally. It is believed his work will be a valuable contribution not only to America but to society and the world in general."

The paragraph explained the knowledge of the others that John was coming; that he had arrived, for the Blue Express came in with the morning. But did not explain why he had

Use Cuticura To Heal Slight Rashes

Before they become serious skin troubles. Bathe with Cuticura Soap and hot water, dry gently, and anoint with Cuticura Ointment. Daily use of Cuticura Soap, assisted by the Ointment when required, keeps the pores active and the skin clear and healthy.

not notified her. Something about it all quivered at her lips, briefly.

"Extraordinary," Kennethworth remarked when she put the paper aside, "how a chap with nothing but a dream can suddenly stumble upon recognition and success. We all remember Wilmore in New York. If I remember, Miss Manago took occasion to be provoked with him."

"Then it was more than an acquaintance," Prince Michael declared. "One is never provoked with an acquaintance. We won't intrude upon that aspect, Mademoiselle," he added, to Joanna. "As you will, probably present him, I'd like to know how he got on so well."

(To Be Continued.)

Had Remarkable Cruise

Dutch Submarine Beats All Records for Non-convoyed Voyages

A wave of enthusiasm spread over this city when a report was received that the Dutch submarine K-13 had beaten all records for non-convoyed voyages by touching Soerabaya after 194 days at sea.

The K-13 is a boat of 820 tons. It left the naval base at Neudiep on May 27 for the Canary Islands.

After a voyage of 3,300 miles to Curaçao, it proceeded to Panama and was the first foreign submarine to navigate the canal under its own power. From Panama the K-13 proceeded to Mazatlan, then to San Francisco and across the Pacific to Honolulu and Guam. It covered the 2,000 miles from Honolulu to Guam in nineteen days.

During the total of 20,000 miles covered in six and one-half months, the submarine used 306,000 liters of fuel oil and 7,500 liters of engine oil.

A MEDICINE THAT ALL MOTHERS PRAISE

Baby's Own Tablets Banish Babyhood and Childhood Ailments

"I have Dr. Oakes, Sania, Ont., says: 'I have used Baby's Own Tablets in my home for the past fifteen years and I believe the good health my children enjoy is due entirely to this medicine.' The Tablets are helpful in everything: colic, fever, colds and are always beneficial to the minor ailments of little ones. I have recommended Baby's Own Tablets to other mothers who have experienced with me as has been satisfactory as my own."

Baby's Own Tablets do one thing only, but they do it well. They act as a gentle laxative which thoroughly regulates the bowels and sweetens the stomach, clearing the system of indigestion, colds and simple fevers and turn the cross, sickly baby into a plump, happy, laughing baby.

Baby's Own Tablets are sold by medicine dealers or direct by mail at \$1.00 per box. Write to The Williams Medicine Co., Brockville, Ont.

Little Helps For This Week

I trust in the mercy of God for ever and ever—Psalms 138, 8.

For us, whatever's undergone, Thou knowest, vilest what is done; Grief may be joy misunderstood, Only the good discern the good; I trust Thee, while my days go on.

I praise Thee while my days go on; I love Thee while my days go on; Through dark and death, through fire and frost,

Will empty arms and treasure lost, I thank Thee while my days go on.—Elizabeth Barrett Browning.

It is the Lord, let him do what seemeth good. Our part is to pray that we may hear patiently whatever trials may be allotted us, firmly trusting in His word that all things shall work together for good to them that love Him.

—Hannah More.

Sneezing?—Use Minard's Liniment.

Heroes Are Made

Because he had crawled out on this ice and rescued a playmate who had broken through, little Willie was the centre of a group of admiring men and women.

"Tell us, my boy, how you were brave enough to risk your life to save your friend," said one of the ladies.

"I had to," was the breathless answer. "He had my skates on."

Easy Road—Good at start, but gets rougher'n a motor toward the home stretch.

For Colds—Minard's Liniment.

Listen!

Have you heard about Pepp's? It's a scientific preparation put up in a little form, which provides an entirely new and effective treatment for coughs, colds, chest and throat troubles. Pepp's contains certain medicinal ingredients, which, when placed upon the lungs, immediately turn into vapor, and are breathed down the air passages to the lungs. Or, if your throat, they soothe the inflamed and irritated membranes of the bronchial tubes; the delicate walls of the air passages, and finally enter and carry relief and healing to the lungs. While no liquid or solid can get to the lungs and air passages, these Pepp's fumes get there direct, and healing commences.

FREE TRIAL. Out on this across the name and date of this paper, and mail it with a stamp to pay for a trial package of Pepp's. A free trial package will be sent you by mail. No charge and stores sell Pepp's, 50c box.

Pepp's

Britain Reducing War Debt

Since June 1923, Has Paid \$642,830,000 to United States

Sir A. Maurice-Low, Washington correspondent of the London daily news, sent a dispatch to his newspaper in which he called attention to the fact that Great Britain already had paid \$642,830,000 to the United States in carrying out the agreement made in 1922 for the funding of the British war-time debt to the United States. He indicated also that inquiries made by him at the British Embassy had demonstrated that there was no intention on the part of his government of asking to be excused from carrying out its obligations.

"Payments began in 1923, when on June 15, \$69,000,000 was paid on interest. On December 15, a similar amount was paid, and \$25,000,000 on principal. In 1924 two payments of \$68,855,000 each were made on interest, and \$23,500,000 on principal."

"In 1925, semi-annual payments for interest were \$68,310,000, and \$24,000,000 for principal. This year the interest payments have been semi-annually \$67,865,000, and the payment on principal has been \$25,000,000."

"Summed up to date, Great Britain has paid to the United States \$547,830,000 as interest, and the debt has been reduced by \$55,000,000."

Most men find it easier to take two steps backward than to take one forward.

A Man of Rare Professional Attainment

The originator of Dr. Pierce's Golden Medical Discovery was the late Dr. W. C. Pierce, M.D. At first he practiced medicine in Western Pennsylvania and his unusual ability and success were soon recognized there. Then he moved to Buffalo, N.Y., and established the World's Dispensary where his famous "Golden Medical Discovery" have ever since been made.

Each succeeding year the sale of Dr. Pierce's Golden Medical Discovery has been greatly increased. Evidently people appreciate the fact that it increases the appetite, stimulates the digestion, helps to enrich the blood, clears the skin of eruptions and blemishes, and makes both men and women feel as they did when they were young. It contains no harmful ingredients.

Ask your nearest druggist for Dr. Pierce's Golden Medical Discovery, in tablet or liquid form, or send 10 cents for a trial package of tablets to Dr. Pierce's Branch Laboratory in Bridgeport, Ont.

G. A. Ware, 5 Condon Block, Edmonton

or I.B.S.A. 270 Dundas St. W., Toronto, Ont.

Stony Plain and District.

The Misses Giebelhaus, of Vegreville, spent the holiday with Mrs. H. Albrecht, Glory Hills.

Mr. W. C. Allen has been awarded the contract for carrying His Majesty's mails from Brightbank to Stony, twice a week.

In Portland, Ore., on Thursday, December 30, 1928, Miss Marie Sonnenheim, late of Stony Plain, became the bride of Mr. J. Hart of Portland. The couple will take up their residence at the latter place.

On going out to a field granary the other morning, Mr. Pete Kulak, a farmer of Rosenthal district, noticed a new sleigh track leading from the granary to an opening in his fence where the wires had been cut. On examining his wheat bin, he felt sure about a load of the grain had been taken since he had last been to it. Pete having good eyesight and keen perception, followed the new trail to the main road, and, tracking the hoofprints and sleigh marks some three miles, he came to where these led into a farm. The owner of the team tracked had just returned from selling a load of wheat to the U. G. G. elevator at Spruce Grove. He was taken into custody, given a preliminary hearing at the local Court, and committed for trial at the next court of competent jurisdiction.

The novelty dance given Friday evening, Dec. 31 by the Holborn U. F. W. A. proved a huge success. The music was good, and everything contributed to make it a very pleasant evening.

The annual gathering of the United Farmers of Alberta will be held in Edmonton on Jan. 18, 19, 20, 21, 1929.

A three-weeks' creamery course is now being offered jointly by the University and the Dept. of Dairying, University of Alberta. The course is planned primarily for men with some practical experience in creamery work. There is no tuition fee.

With the Hockey Players.

A very good hockey game was witnessed at the local rink New Year's day, when the Stonys battled with the Concordians. The game was fast and produced lots of thrills, the score being even for some time when Stoneys, by their superior stick handling, pulled out a winner by 3 goals to 2. The teams:

Stony—Heichele, Ostway, J. P. Miller, Wolfe, Meyer, Smith.
Concordia—Trot, Herzheimer, Raiz, A. Miller, Buschberg, Meyer.

Another good game was played on the afternoon of the 2nd, between Stony and a team from the Grove. Some excellent team work was shown, the game being much better than the score (6 to 1) would indicate. Stony's team was the same as the day before, with the exception of Heichele, who received an injury to his knee on Saturday; his place was taken by Hy Treit.

Groves—Loeblich, J. Miller, W. Brox, C. Fuhr, Miller, V. Herzheimer.

Walther League hockeyists were on the local rink last night, for their first practice.

Stony Plain and District.

Mr. & Mrs. D. H. Pattie, of Rocky Mountain House, were visitors in Stony this week.

Joe Whitelock is spending a vacation at Innisfail.

Paul Werner has been gazetted an Official auditor for 1927.

Rev Dykeman of Barrhead was a visitor in Stony this week.

Miss C. I. Yost, a former resident of this district but now of Trochu, is visiting this week with Miss Wolfe.

While sledding on the local skating rink Thursday, Geo., the young son of Mr. & Mrs. Jac Miller, tripped over his sled, falling on the ice, and breaking his right leg in two places above the knee. He was conveyed to his home nearby, where his injury was attended to by Dr. Ostway.

The installation of the floors of Meridian Lodge, A. F. & A. M., took place Thursday Dec. 30, the proceedings being in charge of R. W. Bras. Dr. Follinsbee, D. McIntosh and W. Blaikie. The officers installed were: W. M., Thomas Scott; I. P. M., R. B. Brooks; S. W., J. H. Lory; J. W., E. H. Finnsenden; Deacons, Dr. Walton and J. McCulla. At the close, a banquet was given, at which speeches appropriate to the occasion were made.

The death occurred Tuesday, Jan. 4, of Mrs. Nichol, wife of Mr. George Nichol, of Blueberry district. Deceased was in her 68th year, and will be missed by a large circle of friends and relatives, to whom she was endeared by her kindly disposition. The funeral takes place tomorrow, Jan. 7.

Contractor Knight is putting on a big dance in the new schoolhouse at Carvel tomorrow night, the 7th.

The annual gathering of the United Farmers of Alberta will be held in Edmonton this year, on January 18, 19, 20 and 21.

Wheat Pool contract forms are obtainable at The Sun office, where you may sign up.

Get your application for 1927 motor license at The Sun Office.

Spruce Grove News

A fairly good crowd filled Schwindt's hall on the occasion of the Walther League concert, last week, and a good program was given. The local League was helped by members of Stony's League and Concordia students. A dialog "Troubled by Ghosts," made quite a hit.

Mr. W. Trautman, who farms south of here, is said to have a thousand bushels of seed oats from his 1925 crop.

Here and There

Canada's birth rate leads all the white races of the world, according to a close study made of comparative figures. Canada's birth rate is 24.4 to the thousand, and Australia comes next with 23.2. England and Wales fall slightly below France with 18.8.

"The manufacturing industry is moving west," says J. E. Walsh, General Manager of the Canadian Manufacturers' Association. "The increase in prairie industries shows this. We are having the same experience here as they had in the United States. The Prairie Provinces are fast becoming industrialized."

A gold medal awarded to the Canadian Pacific Railway in recognition of the excellence of its exhibits at the Canadian Exhibition recently held in Toronto, was received at headquarters of the system here today. Similar medals have also been awarded to the Dominion and Provincial Governments and to a limited number of exhibitors.

This, from the Lethbridge Herald, is hard to surpass: "A farmer moved onto a half section in the Iron Springs district last spring. He got in a good crop; irrigated carefully and watched results. He threshed a \$6,000 crop in this first year; paid \$2,800 on his land; \$1,500 on equipment and cleared off a \$400 loan. This left him a comfortable balance of \$1,200 to go on with."

The President Beatty Prize is being offered by the President of the Canadian Pacific Railway to the man obtaining the highest number of marks during the coming training season at the training farm of the British Ministry of Labor at Brandon, Norfolk. The award consists of a cash prize and employment at current wages upon the C.P.R. Supply Farm at Strathmore, Alberta. A similar prize will be made available in the spring of 1928.

An outstanding feature of the past few weeks has been the export of live foxes by the Canadian Pacific Express in Montreal. Trade statistics show that in the past fiscal year 5,590 live foxes, valued at \$1,434,686, left Canada for other countries. Canadian foxes have gone to be foundation stock in the United States, United Kingdom, Belgium, France, Germany, Newfoundland, Norway, Switzerland, Finland, Japan and Russia.

Announcement was made from Canadian Pacific Railway headquarters here recently that two free scholarships, covering one year's tuition in the Faculty of Arts and four years' tuition in architecture, chemical, civil, mechanical or electrical engineering at McGill University, are offered by the company, subject to competitive examination, to apprentices and other employees enrolled on the permanent staff of the company and under 21 years of age, and to minor sons of employees.

The recent snowfalls have directed attention, earlier than usual, to the coming Dog-Derby—the 1927 Eastern International Dog-Sled Derby—which is to be run off at Quebec City on February 21st, 22nd and 23rd. Six entries have been received so far: H. Chevrete, who will carry the sailors The Paquet Co., Ltd.; an Ontario Paper Co. entry; H. I. Sutton, of Chicago; two Price Brothers entries, and P. J. Molloy, of Berlin, New Hampshire. Such is the line-up to date, about twenty entries being expected.

Sir Frederick Williams-Taylor, General Manager of the Bank of Montreal, points out in the current Public Utilities issue of the "Financial Times," that Canada's utilization of power has increased 180 per cent. in the past ten years and that the country now stands second in the world in the utilization of hydro power. When present plans mature Canada will have 4,500,000 h.p. in use, representing a capital investment of \$24,000,000, while the wind power wealth will still be estimated conservatively at \$1,000,000,000 h.p.
